Carlos Dualibe

FULL STACK DEVELOPER

Argentina | Remote / Freelance | carlosdualive@gmail.com
github.com/yttuD | carlos-dualibe.vercel.app

Software developer focused on TypeScript, React, APIs and data-driven applications. I work on personal products, client software and collaborative university projects, with attention to user experience, business rules and reliable persistence.

EXPERIENCE & SELECTED PROJECTS

CLIENT SOFTWARE DEVELOPMENT

? Mi Ciclo: mobile-first wellness application in development with Next.js, TypeScript, Supabase and Capacitor. User journeys, onboarding and consent; private source code.

? Business operations: offline-first architecture using TypeScript, SQLite and remote synchronization. An anonymized client case with protected data.

? Web commerce: product catalogs, administrative views and business features using Next.js and Firebase.

PERSONAL & UNIVERSITY PROJECTS

? Rendo: rental platform with public beta and private code. Listings, availability, bookings and roles using Next.js, NestJS and Supabase.

? TransAI: collaborative university visual-inspection project involving React, Django, Node.js and Python/FastAPI services.

? Appointments: booking interface and business logic using React, Node.js, Prisma and PostgreSQL. Backend and database deployments are discontinued.

EDUCATION

Universidad Tecnológica Nacional (UTN)

? Programming studies in progress.

TECHNICAL SKILLS

Frontend

? TypeScript, JavaScript, React, Next.js, Tailwind CSS

Backend & data

? Node.js, NestJS, Python, Django, PostgreSQL, SQLite, Supabase, Firebase

Tooling

? Git, Playwright, Docker, testing and technical documentation

AVAILABILITY

Remote employment and freelance

? Open to remote software development roles and freelance projects.
