Carlos Dualibe

FULL STACK DEVELOPER

Argentina | Remote / Freelance | carlosdualive@gmail.com
github.com/yttuD | carlos-dualibe.vercel.app

Software developer focused on TypeScript, React, APIs and data-driven applications. I work on personal products, client software and collaborative university projects, with attention to user experience, business rules and reliable persistence.

EXPERIENCE AND PROJECTS

CLIENT SOFTWARE

- Mi Ciclo: mobile-first wellness application in development with Next.js, TypeScript, Supabase and Capacitor; user journeys and consent flows. Private code.
- Business operations: offline-first architecture with TypeScript, SQLite and remote sync. An anonymized client project.
- Web commerce: product catalogs, administration and integrations using Next.js and Firebase.

PERSONAL AND UNIVERSITY PROJECTS

- Rendo: rental platform with a public beta and private source; listings, availability, bookings and roles. Next.js, NestJS and Supabase.
- TransAI: collaborative university visual-inspection project using React, Django, Node.js and Python/FastAPI.
- Appointments: booking UI and domain logic using React, Node.js, Prisma and PostgreSQL. Backend and database deployment discontinued.

EDUCATION

Universidad Tecnológica Nacional (UTN)

- Programming studies in progress.

TECHNICAL SKILLS

Frontend

- TypeScript, React, Next.js, JavaScript, Tailwind CSS

Backend and data

- Node.js, NestJS, Python, Django, PostgreSQL, SQLite, Supabase, Firebase

Workflow

- Git, Playwright, Docker, testing and technical documentation

AVAILABILITY

Remote roles and freelance

- Open to remote software engineering roles and freelance projects.
